

Hands-on Exercise No. 2
DigiSkills 3.0 Batch-04
Cloud Computing

Total Marks: 10

Due Date: 10/09/2026

Instructions:

Please read the following instructions carefully before submitting this Hands-on Exercise:

- Use MS Word to prepare exercise solution.
- You may consult tutorials and videos if the concept is not clear.
- Your submitted exercise will not be considered/counted if:
 - It is submitted after due date.
 - It is not in the required format (.doc or .docx)
 - It does not open, or file is corrupt.
 - It is copied (partial or full) from any source (websites, forums, students, etc.)

Learning Outcome:

After completing this exercise, you shall be able to:

- Launch a Free Tier eligible EC2 instance on AWS.
- Select the correct instance type, AMI, and configuration for Free Tier usage.
- Create and download a key pair for secure access.
- Configure a basic security group to allow SSH access.
- Verify that the EC2 instance is running successfully.
- Understand the importance of terminating unused instances to avoid charges.

Problem Statement

In this practical exercise, you will launch your first virtual server in the AWS Cloud by creating a Free Tier eligible Amazon EC2 instance. This will help you understand how to provision compute resources on AWS while staying within the Free Tier limits.

Task 1: (10 Marks)

1. Sign in to the AWS Account.
2. Navigate to the EC2 service.
3. Click on Launch Instance.
4. Give your instance a name (e.g., My-First-EC2-Instance).
5. Select a Free Tier eligible AMI (Amazon Linux 2023 or Ubuntu Server 22.04/24.04 LTS is recommended).
6. Choose the Free Tier eligible instance type: t2.micro or t3.micro.
7. Create a new Key Pair, download the .pem file, and keep it safe.
8. Under Network settings, allow SSH traffic from My IP (or Anywhere – for learning purposes only).
9. Keep storage at the default Free Tier eligible size (usually 8 GB gp3).
10. Review all settings and click Launch Instance.
11. Wait until the instance state becomes Running and take a screenshot of the running instance (showing Instance ID, Instance Type, and Status).

Note:

1. Create an MS Word file with clear screenshots of all the above-mentioned tasks.
2. We will analyze your solution based on the steps that you will perform.

BEST OF LUCK 😊

How to submit solution file on LMS?

Please perform the following steps for submitting your solution using LMS:

- 1) Login to the LMS
- 2) Click on the **Exercises** button within the **My Activities** section

- 3) Click on the submit button to upload your Solution.

- 4) Keep in mind to upload your Solution in .doc or .docx format
