

**Hands-on Exercise No. 1**  
**DigiSkills 3.0 Batch-04**  
**Cloud Computing**

**Total Marks: 10**

**Due Date: 27/08/2026**

**Instructions:**

Please read the following instructions carefully before submitting this Hands-on Exercise:

- Use MS Word to prepare exercise solution.
- You may consult tutorials and videos if the concept is not clear.
- Your submitted exercise will not be considered/counted if:
  - It is submitted after due date.
  - It is not in the required format (.doc or .docx)
  - It does not open, or file is corrupt.
  - It is copied (partial or full) from any source (websites, forums, students, etc.)

**Learning Outcome:**

After completing this exercise, you shall be able to:

- Create a new AWS Free Tier account.
- Add a valid payment method during account registration.
- Understand the importance of securing the root user.
- Enable Multi-Factor Authentication (MFA / 2FA)
- Verify that MFA is working correctly at the time of sign-in.

## **Problem Statement**

Now that you have learned the basics of cloud computing and AWS, the first practical step is to create your own AWS account and secure it properly. In this exercise, you will create a new AWS Free Tier account, add a payment method, and enable Multi-Factor Authentication (Two-Factor Authentication) on the root user. This is one of the most important security practices in AWS.

### **Task 1: (8 Marks)**

1. Go to the official AWS website and click on Create an AWS Account.
2. Enter your email address, choose an AWS account name, and create a strong password.
3. Complete the email verification process.
4. Fill in your contact information (full name, phone number, and address).
5. Add a valid payment method (credit/debit card).
6. Complete the identity verification step (SMS or voice call).
7. Select the Basic Support – Free plan and complete the account creation.

### **Task 2: (2 Marks)**

1. Sign in to the AWS Management Console as the Root user.
2. Enable Multi-Factor Authentication (MFA) on the root user using an authenticator app (Google Authenticator, Microsoft Authenticator, or Authy).
3. Sign out of the console and sign in again to verify that MFA is working (you must enter the

**Note:** AWS will temporarily authorize a small amount (usually \$1) to verify the card. This amount is refunded and you will not be charged if you stay within Free Tier limits.

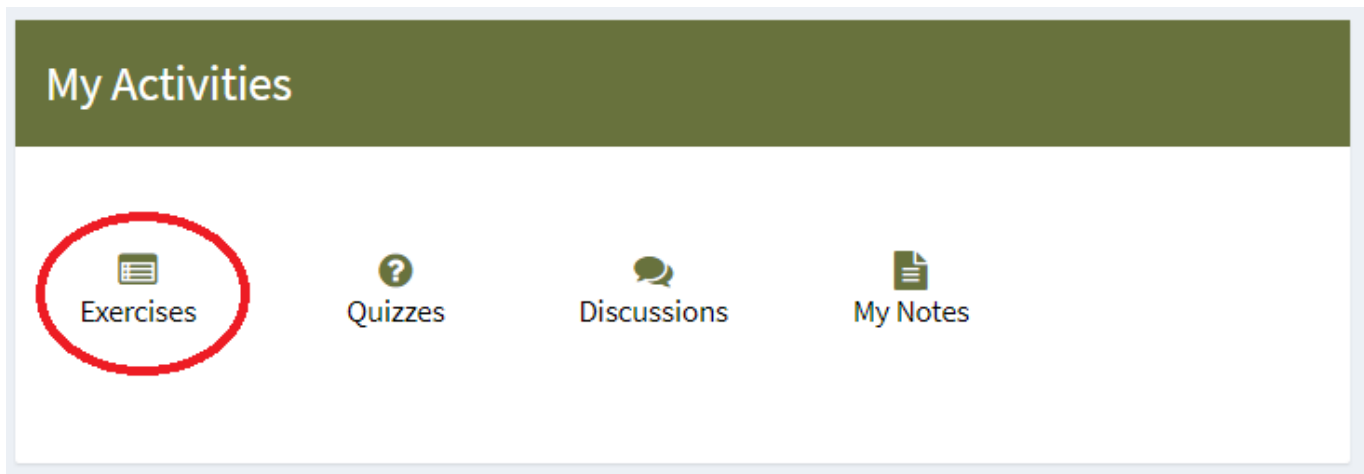

1. Do not include screenshots containing sensitive information, such as debit card details.
2. Create an MS Word file with clear screenshots of all the above-mentioned tasks.
3. We will analyze your solution based on the steps that you will perform.

BEST OF LUCK ☺

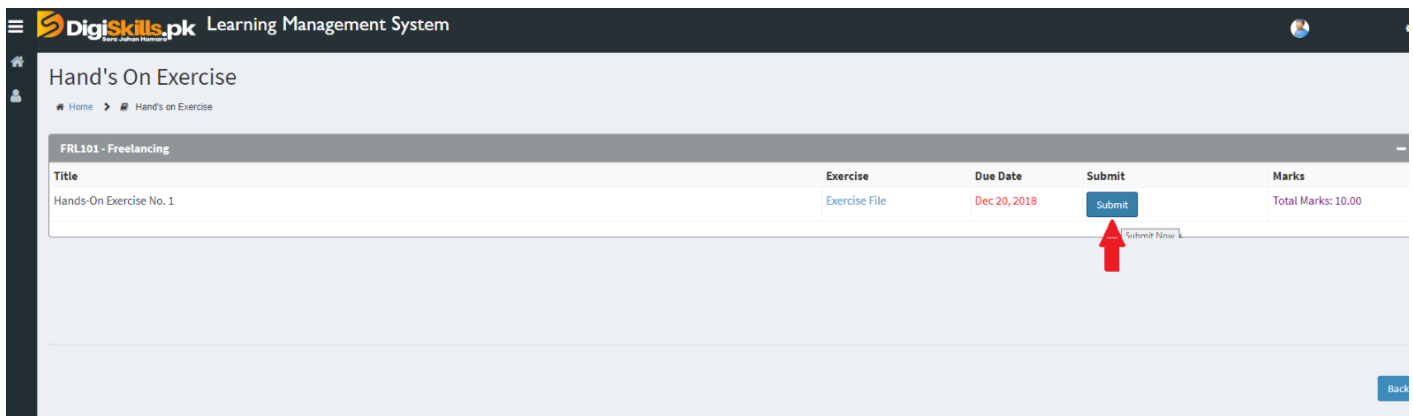

## How to submit solution file on LMS?

Please perform the following steps for submitting your solution using LMS:

- 1) Login to the LMS
- 2) Click on the **Exercises** button within the **My Activities** section

- 3) Click on the submit button to upload your Solution.

- 4) Keep in mind to upload your Solution in .doc or .docx format
