Hands-on Exercise No. 4 **DigiSkills 3.0 Batch-04** **Cloud Computing**	**Total Marks: 10** **Due Date: 15/10/2026**

Instructions:

Please read the following instructions carefully before submitting this Hands-on Exercise:

- Use MS Word to prepare exercise solution.
- You may consult tutorials and videos if the concept is not clear.
- Your submitted exercise will not be considered/counted if:
  - It is submitted after due date.
  - It is not in the required format (.doc or .docx)
  - It does not open, or file is corrupt.
  - It is copied (partial or full) from any source (websites, forums, students, etc.)

Learning Outcome:

After completing this exercise, you shall be able to:

- Understand the basic purpose of Amazon S3 (Simple Storage Service).
- Create an S3 bucket with a unique name.
- Upload a file to the S3 bucket.
- Block publicly accessible (optional basic setting).
- View and verify the uploaded file in the S3 console.

Problem Statement

Amazon S3 is one of the most popular and important storage services in AWS. In this exercise, you will create your first S3 bucket, upload a simple file, and explore basic bucket settings. This will help you understand how cloud storage works in a practical way.

Task: (10 Marks)

1. Sign in to the AWS Account.
2. Navigate to the S3 service.
3. Click on Create bucket.
4. Enter a unique bucket name (e.g., my-first-bucket-yourname-2026). Note: Bucket names must be globally unique.
5. Keep the AWS Region as default (or choose the nearest region).
6. Leave Object Ownership and Block Public Access settings as default for now.
7. Keep all other settings as default and click Create bucket.
8. Open the newly created bucket.
9. Click Upload and upload any simple file (e.g., a text file, image, or PDF of less than 5 MB).
10. Copy the Object URL and open it in a new browser tab to verify it Access Denied.

Note:

1. Create an MS Word file with clear screenshots of all the above-mentioned tasks.
2. We will analyze your solution based on the steps that you will perform.
3. You may delete the bucket after the exercise if you want to clean up resources.

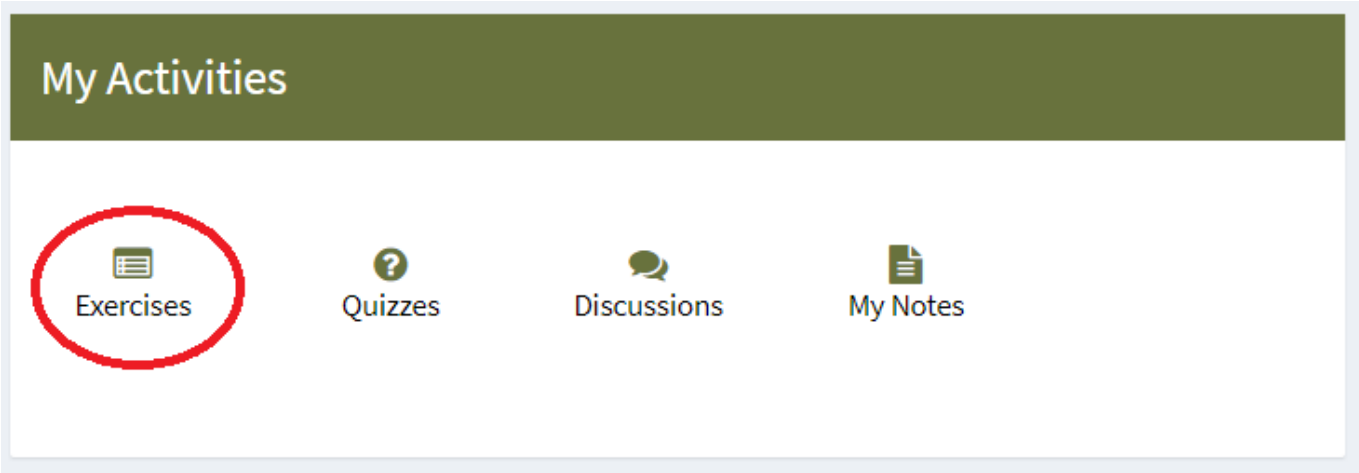

BEST OF LUCK ☺

How to submit solution file on LMS?

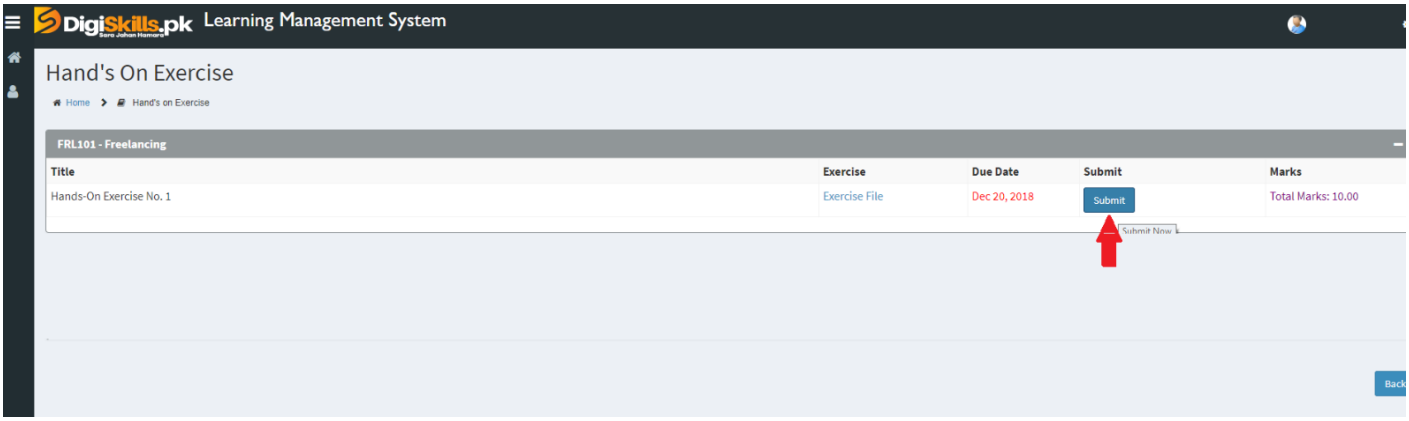

Please perform the following steps for submitting your solution using LMS:

1) Login to the LMS

2) Click on the **Exercises** button within the **My Activities** section

3) Click on the submit button to upload your Solution.

4) Keep in mind to upload your Solution in .doc or .docx format
